

CRC offers a complete range of maintenance and repair speciality chemicals. Products are developed to provide value-driven solutions to end-user problems. With a wide range of products, CRC offers its customers a convenient, complete source for all of the products they need. **Providing quality chemicals to Canadian Industry for over 25 years!**

# BEE PREPARED!

## WASP AND HORNET KILLER

CRC BUG BLAST™ kills Wasps, Hornets, and Yellowjacket nests, in trees or attached to buildings.

### ADVANTAGES

**- Kills Wasps, Yellowjackets, and Hornets on contact** • Gives rapid knock-down and kill of Wasps, Yellowjackets, and Hornets • Gives rapid contact kill and residual kill of Wasps and Hornets returning to the treated nest • Reaches nests more than 7 metres above ground

### APPLICATIONS

For control of nests of Wasps, Yellowjackets, and Hornets.

### PHYSICAL PROPERTIES

Domestic Reg No: 27874  
 Tetramethrin: 0.200%  
 D-phenothrin: 0.125%  
 Contains petroleum distillate  
 Di-electric Breakdown voltage:  
 41.0 KV by ASTM Test  
 Read label before using.

Part 72010      397 g      12 units per case

The best time to spray the nest is in the early morning or early evening, when air temperature is cooler, most insects are in the nest and little activity is observed around the nest opening. Spray only if the air is still. Stand at safe distance from the nest, not directly under it. Hold container upright at arms length, point the actuator at the nest and spray into the opening of the nest first. Then spray the rest of the nest until it is saturated. Treated insects may fall out of the nest and die. Any insects returning to the nest after treatment will be killed. Wait 48 hours before removing the nest. Foliage of desirable plants that were contacted with spray should be hosed off.
