

CRC Copper Anti-Seize & Lubricating Compound

- A general purpose anti-seize lubricant that prevents seizing caused by high-temperatures, heavy loads, vibrations and corrosion.

- Recommended to lubricate fittings, flanges, headers, threaded surfaces, pipes, plugs and manifolds to prevent seizing and galling of surfaces.

- Remove with general purpose degreaser.

| Part Number | Package Type | Unit Size | Units/Case |
|-------------|------------------|-----------|------------|
| 72095 | aerosol | 340 g | 12 |
| 72901 | brush top bottle | 227 g | 12 |
