Appearance & Odor: Clear, water-white liquid, mild solvent odor

Potential Health Effects:

ACUTE EFFECTS:

EYE: May cause mild eye irritation. Symptoms include stinging, tearing and redness.

SKIN: Can cause skin irritation. Prolonged or repeated contact may dry the skin. Symptoms include redness, burning, and drying and cracking of the skin, burns and other skin damage. Passage of this material through the skin is possible, but it is unlikely to result in harmful effects during safe handling and use.

INHALATION: Breathing small amounts of this material during normal handling is not likely to cause harmful effects. Breathing large amounts may be harmful. Symptoms usually include nose and throat irritation and central nervous system depression (dizziness, drowsiness, weakness, nausea, headache, unconsciousness).

INGESTION: Swallowing small amounts of this material during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful. This material can get into the lungs during swallowing or vomiting and can result in lung inflammation and other lung injury.

CHRONIC EFFECTS: None known

TARGET ORGANS: liver, kidney

Medical Conditions Aggravated by Exposure: pre-existing skin conditions, lung conditions

See Section 11 for toxicology and carcinogenicity information on product ingredients.

Section 4: First Aid Measures

Eye Contact: Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.

Skin Contact: Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

Inhalation: Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

Ingestion: Seek medical attention. If individual is drowsy or unconscious, do not give anything by mouth; place individual on the left side with the head down.

Note to Physicians: This material is an aspiration hazard. Potential danger from aspiration must be weighed against possible oral toxicity when deciding whether to induce vomiting.

Section 5: Fire-Fighting Measures

Flammable Properties: This product is a Class IB Flammable Liquid.

Flash Point: < 0°F / -17°C (TCC)	Upper Explosive Limit: 8.3
Autoignition Temperature: 500°F / 260°C	Lower Explosive Limit: 1.3

Fire and Explosion Data:

Suitable Extinguishing Media: Class B fire extinguishers, carbon dioxide, dry chemical, regular foam

Products of Combustion: Oxides of carbon, various hydrocarbons.

Explosion Hazards: Containers, when exposed to heat from fire, may build pressure and rupture. Vapors may accumulate in a confined space and create a flammable atmosphere.

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

Section 6: Accidental Release Measures

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Product Name: Chlor-Free® Degreaser (bulk)

Product Number (s): 03187

Methods for Containment & Clean-up: Remove all sources of ignition. Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

Section 7: Handling and Storage

Handling Procedures: Do not use near sources of ignition including static ignition hazards. Use with proper ventilation. Use proper grounding and bonding procedures when transferring material. Wash hands after use and before contacting food. For product use instructions, please see the product label.

Storage Procedures: Store in a cool dry area out of direct sunlight. Containers should be tightly closed while in storage.

Aerosol Storage Level: NA

Section 8: Exposure Controls/Personal Protection

Exposure Guidelines:

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Cyclohexane	300	NE	100	NE	NE		ppm
Ethanol	1000	NE	NE	1000	NE		ppm
Hexane isomers	500	1000 (v)	500	1000	NE		ppm
Methanol	200	NE	200 (s)	250 (s)	NE		ppm
n-Hexane	500	NE	50 (s)	NE	NE		ppm
N.E. – Not Established (c) – ceiling (s) – skin (v) – vacated							

Controls and Protection:

Engineering Controls: Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

Respiratory Protection: None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as natural rubber. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.
