## Section 2: Hazards Identification

---

---

### Emergency Overview

**DANGER:** Combustible. Eye Irritant. Harmful or Fatal if Swallowed.  
Appearance & Odor: Clear liquid, mild citrus odor

### Potential Health Effects:

**ACUTE EFFECTS:**

**EYE:** May cause eye irritation including burning and redness. Severity of irritation will depend upon quality and duration of exposure.

**SKIN:** Brief exposures are not expected to cause any health effects. Prolonged exposure may cause mild to moderate irritation. Persons with sensitive skin may experience redness or drying of the skin.

**INHALATION:** Breathing small amounts or vapor during normal handling is not likely to cause harmful effects. Breathing large amounts may cause irritation to the nose and throat as well as headache, drowsiness or other nervous system effects.

**INGESTION:** Swallowing small amounts during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful. Main hazard is aspiration of this material into the lungs during swallowing or vomiting. This can result in lung inflammation and other lung injury.

**CHRONIC EFFECTS:** Frequent and prolonged exposure to skin can cause dermatitis.

**TARGET ORGANS:** None known

**Medical Conditions Aggravated by Exposure:** Eye and skin conditions

See Section 11 for toxicology and carcinogenicity information on product ingredients.

### Section 4: First Aid Measures

---

---

Eye Contact: Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.

Skin Contact: Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

Inhalation: Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

Ingestion: Do NOT induce vomiting due to aspiration hazard. Seek medical attention.

*Note to Physicians:* This material is an aspiration hazard.

---

---

### Section 5: Fire-Fighting Measures

---

---

**Flammable Properties:** This product is a Class II Combustible Liquid.

Flash Point: 110°F / 43°C (Seta)	Upper Explosive Limit: 6.1
Autoignition Temperature: None	Lower Explosive Limit: 0.7

**Fire and Explosion Data:**

Suitable Extinguishing Media: Use extinguishing media appropriate for a Class B fire such as carbon dioxide, foam or dry chemical. Do not use water.

Products of Combustion: Oxides of carbon and irritating fumes.

Explosion Hazards: Containers, when exposed to heat from fire, may build pressure and rupture.

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

---

---

### Section 6: Accidental Release Measures

---

---

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Methods for Containment & Clean-up: Eliminate sources of ignition. Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

**Product Number (s): 14173, 14174**

---

---

## **Section 7: Handling and Storage**

---

---

**Handling Procedures:** Do not use near flames, sparks or other sources of ignition. Do not heat product. Use with adequate ventilation in order to prevent vapor build-up and a flammable atmosphere. Avoid contact with skin and eyes. Wash hands after use and before consuming food. For product use instructions, please see the product label.

**Storage Procedures:** Store in a cool dry area out of direct sunlight. Keep container closed when not in use. Store out of reach of children.

**Aerosol Storage Level:** NA

---

---

## **Section 8: Exposure Controls/Personal Protection**

---

---

### **Exposure Guidelines:**

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
d-Limonene	NE	NE	NE	NE	NE		
Stoddard solvent	100 (v)	NE	100	NE	NE		ppm
N.E. – Not Established                      (c) – ceiling      (s) – skin      (v) – vacated							

### **Controls and Protection:**

**Engineering Controls:** Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

**Respiratory Protection:** None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

**Eye/face Protection:** For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

**Skin Protection:** Use protective gloves such as nitrile or other synthetic rubbers. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.
