**Potential Health Effects:**

**ACUTE EFFECTS:**

**EYE:** Not known to be an eye irritant. Contact with eyes may cause temporary irritation. May produce oil film causing brief reversible dimness of sight.

**SKIN:** Not known to be a skin irritant. Several repeated, prolonged exposures may cause slight irritation.

**INHALATION:** Single or brief exposures are not expected to cause health effects. Prolonged exposures may cause mild irritation to the nose and throat.

**INGESTION:** No toxicity effects expected from ingestion. May cause minor stomach ache or irritation.

### Section 4: First Aid Measures

---

---

**Eye Contact:** Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.

**Skin Contact:** Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

**Inhalation:** Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

**Ingestion:** Do NOT induce vomiting. Contact a physician immediately.

**Note to Physicians:** Acute aspirations of large amounts of oil-laden material may produce serious aspiration pneumonia. Patients who aspirate these oils should be followed for the development of long-term sequelae.

---

---

### Section 5: Fire-Fighting Measures

---

---

**Flammable Properties:** This product is not flammable in accordance with aerosol flammability definitions.

Flash Point: none (TCC)

Upper Explosive Limit: ND

Autoignition Temperature: ND

Lower Explosive Limit: ND

**Fire and Explosion Data:**

**Suitable Extinguishing Media:** Class B fire extinguishers or other materials suitable for chemical fire

**Products of Combustion:** Oxides of carbon, sulfur, and nitrogen; silica; formaldehyde (@ temperatures of > 300°F / 149°C)

**Explosion Hazards:** Aerosol containers, when exposed to heat from fire, may build pressure and explode.

**Protection of Fire-Fighters:** Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

---

---

### Section 6: Accidental Release Measures

---

---

**Personal Precautions:** Use personal protection recommended in Section 8.

**Environmental Precautions:** Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

**Product Name: Water-based Silicone (aerosol)**

**Product Number (s): 73035**

Methods for Containment & Clean-up: Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

---

---

## Section 7: Handling and Storage

---

---

Handling Procedures: Use good personal hygiene practices. Wash hands after use and before handling food. Use in elevated temperatures will require extra ventilation. Use caution around energized equipment. The metal container will conduct electricity if it contacts a live source. This may result in injury to the user from electrical shock and/or flash fire. For product use instructions, please see the product label.

Storage Procedures: Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120°F / 49°C to prevent cans from rupturing.

Aerosol Storage Level: I

---

## Section 8: Exposure Controls/Personal Protection

---

---

### Exposure Guidelines:

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Water	NE	NE	NE	NE	NE		
White mineral oil	5*	NE	5*	10*	NE		mg/m <sup>3</sup>
Polydimethylsiloxane	NE	NE	NE	NE	NE		
Liquefied petroleum gas	1000	NE	1000	NE	NE		ppm
N.E. – Not Established      (c) – ceiling      (s) – skin      (v) – vacated      * – oil mist							

### Controls and Protection:

Engineering Controls: Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

Respiratory Protection: None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as neoprene or butyl rubber. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.
