

SAFETY DATA SHEET

GHS

United States

Section 1. Product and company identification

Product name MOLYVAN® L In case of emergency

1-203-853-1400

Code

29105

Chemtrec: 1-800-424-9300

30 Winfield Street

Outside US: +1-703-527-3887

Norwalk, CT 06855

Vanderbilt Chemicals, LLC

Chemical name Molybdenum, bis {O,O-bis (2-ethylhexyl) phosphorodithioate-S,S'}dioxodi-u-thioxodi

Molybdenum di(2-ethylhexyl)phosphorodithioate in petroleum process oil. Synonym

Material uses Friction reducer

Liquid. **Product type**

Supplier/Manufacturer

Section 2. Hazards identification

OSHA/HCS status This material is considered hazardous by the OSHA Hazard Communication Standard

(29 CFR 1910.1200).

Classification of the SKIN IRRITATION - Category 2 SKIN SENSITIZATION - Category 1B substance or mixture

Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity:

100%

GHS label elements

Hazard pictograms

Signal word Warning

Hazard statements Causes skin irritation.

May cause an allergic skin reaction.

Precautionary statements

Prevention Wear protective gloves. Avoid breathing vapor. Wash hands thoroughly after handling.

Contaminated work clothing must not be allowed out of the workplace.

IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before Response

reuse. If skin irritation or rash occurs: Get medical attention.

Storage Not applicable.

Disposal Dispose of contents and container in accordance with all local, regional, national and

international regulations.

Hazards not otherwise

classified

None known.

6/14/2018 Validation date 10/17/2018 Date of previous issue 1/12

Section 3. Composition/information on ingredients

Substance/mixture Mixture

Ingredient name	CAS number	% by weight
molybdenum di(2-ethylhexyl)phosphorodithioate petroleum process oil, <3.0% DMSO extractable material	72030-25-2 64742-52-5	75 25

For Europe, EC number 947-946-9 applies for REACH registration purposes for molybdenum trioxide, reaction products with bis[O,O-bis(2-ethylhexyl)] hydrogen dithiophosphate.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact Immediately flush eyes with plenty of water, occasionally lifting the upper and lower

evelids. Check for and remove any contact lenses. Continue to rinse for at least 10

minutes. Get medical attention.

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. If

not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical

attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin contact Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash

contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean

shoes thoroughly before reuse.

Ingestion Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and

keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately.

Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact

No known significant effects or critical hazards.

Inhalation

No known significant effects or critical hazards.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Ingestion No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact Adverse symptoms may include the following:

pain or irritation watering

redness

Inhalation No specific data.

 Validation date
 : 10/17/2018
 Date of previous issue
 : 6/14/2018
 2/12

Section 4. First aid measures

Skin contact Adverse symptoms may include the following:

> irritation redness

Ingestion No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician Treat symptomatically. Contact poison treatment specialist immediately if large

quantities have been ingested or inhaled.

Specific treatments No specific treatment.

No action shall be taken involving any personal risk or without suitable training. It may **Protection of first-aiders**

be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash

contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing

media

Unsuitable extinguishing

media

Use an extinguishing agent suitable for the surrounding fire.

Decomposition products may include the following materials:

None known.

Specific hazards arising from the chemical

Hazardous thermal

decomposition products

In a fire or if heated, a pressure increase will occur and the container may burst.

carbon dioxide carbon monoxide sulfur oxides phosphorus oxides metal oxide/oxides

Special protective actions

for fire-fighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable

training.

Special protective

equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing

apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is

inadequate. Put on appropriate personal protective equipment.

For emergency responders

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-

emergency personnel".

Validation date Date of previous issue 6/14/2018 10/17/2018 3/12

Section 6. Accidental release measures

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures

Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
molybdenum di(2-ethylhexyl)phosphorodithioate	ACGIH TLV (United States, 6/2013). Notes: as Mo TWA: 0.5 mg/m³, (as Mo) 8 hours. Form: Respirable fraction OSHA PEL 1989 (United States, 3/1989). Notes: as Mo
	TWA: 5 mg/m³, (as Mo) 8 hours. Form: Soluble OSHA PEL (United States, 2/2013). Notes: as Mo TWA: 5 mg/m³, (as Mo) 8 hours.
petroleum process oil, <3.0% DMSO extractable material	ACGIH TLV (United States, 6/2013). TWA: 5 mg/m³ 8 hours. Form: Inhalable fraction

 Validation date
 : 10/17/2018
 Date of previous issue
 : 6/14/2018
 4/12

Section 8. Exposure controls/personal protection

NIOSH REL (United States, 10/2013).

TWA: 5 mg/m³ 10 hours. Form: Mist STEL: 10 mg/m³ 15 minutes. Form: Mist

ACGIH TLV (United States).

STEL: 10 mg/m³

OSHA PEL (United States, 2/2013).

TWA: 5 mg/m³ 8 hours.

Appropriate engineering controls

Environmental exposure controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. Recommended: splash goggles

Skin protection

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: lab coat

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Personal protective equipment (Pictograms)

Validation date : 10/17/2018 Date of previous issue : 6/14/2018 5/12

Section 9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Green. [Dark] Odor Not available. Not available. **Odor threshold** pН Not available. **Melting point** Not available. **Boiling point** Not available.

Flash point Closed cup: 139°C (282.2°F) [Pensky-Martens.]

Burning time Not applicable. **Burning rate** Not applicable. **Evaporation rate** Not available. Flammability (solid, gas) Not available. Lower and upper explosive Not available.

(flammable) limits

Vapor pressure Vapor density

Not available. Not available.

Density 1.08 g/cm3 1.08 **Relative density**

Insoluble in the following materials: cold water. Solubility

Solubility in water Not available. Partition coefficient: n-Not available.

octanol/water

Not available. **Auto-ignition temperature Decomposition temperature** Not available. **SADT** Not available.

Kinematic (room temperature): 1.76 cm²/s (176 cSt) [at 25°C] **Viscosity**

Section 10. Stability and reactivity

Reactivity No specific test data related to reactivity available for this product or its ingredients.

Chemical stability The product is stable.

Possibility of hazardous

reactions

Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid No specific data.

Incompatible materials No specific data.

Hazardous decomposition

products

Under normal conditions of storage and use, hazardous decomposition products should

not be produced.

Validation date Date of previous issue 6/14/2018 10/17/2018 6/12

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
petroleum process oil, <3. 0% DMSO extractable material	LD50 Dermal	Rabbit	>2000 mg/kg	-
molybdenum di(2-ethylhexyl) phosphorodithioate	LD50 Oral LD50 Dermal	Rat Rabbit	>5000 mg/kg 10 mL/kg	-
	LD50 Oral	Rat	6.81 mL/kg	-

Irritation/Corrosion

Not available.

Conclusion/Summary

Skin molybdenum di(2-ethylhexyl)phosphorodithioate: Causes skin irritation. (EPISKIN

Human Skin Model Test)

Eyes molybdenum di(2-ethylhexyl)phosphorodithioate: Non-irritating to the eyes. (Bovine

Corneal Opacity and Permeability Test Method)

Sensitization

3	Route of exposure	Species	Result
molybdenum di(2-ethylhexyl) phosphorodithioate	skin	Mouse	Sensitizing

Mutagenicity

Product/ingredient name	Test	Experiment	Result
molybdenum di(2-ethylhexyl) phosphorodithioate	OECD 471	Experiment: In vitro Subject: Bacteria	Negative
	OECD 490	Experiment: In vitro Subject: Mammalian-Animal	Negative
	OECD 487	Experiment: In vitro Subject: Mammalian-Human	Negative

Carcinogenicity

Not available.

Reproductive toxicity

Not available.

Conclusion/Summary molybdenum di(2-ethylhexyl)phosphorodithioate:

Rat, Oral, OECD 422, 28d, NOAEL: 100 mg/kg bw/day (nominal) Rat, Oral, OECD 422, 6d, NOAEL: 300 mg/kg bw/day (nominal)

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

Not available.

 : 10/17/2018
 Date of previous issue
 : 6/14/2018
 7/12

Section 11. Toxicological information

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on the likely

routes of exposure

Routes of entry anticipated: Oral, Dermal, Inhalation.

Potential acute health effects

Eye contact

No known significant effects or critical hazards.

Inhalation

No known significant effects or critical hazards.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Ingestion No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact Adverse symptoms may include the following:

pain or irritation

watering redness

Inhalation No specific data.

Skin contact Adverse symptoms may include the following:

irritation redness

Ingestion No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate Not available.

effects

Potential delayed effects Not available.

Long term exposure

Potential immediate Not available.

effects

Potential delayed effects Not available.

Potential chronic health effects

Not available.

General Once sensitized, a severe allergic reaction may occur when subsequently exposed

to very low levels.

Carcinogenicity

No known significant effects or critical hazards.

Mutagenicity

No known significant effects or critical hazards.

Numerical measures of toxicity

Validation date : 10/17/2018 Date of previous issue : 6/14/2018 8/12

Section 11. Toxicological information

Acute toxicity estimates

Not available.

Other information

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
molybdenum di(2-ethylhexyl) phosphorodithioate	Acute EC50 100 mg/l	Algae	72 hours
	Acute EC50 100 mg/l Acute EC50 1000 mg/l Acute LC50 100 mg/l	Daphnia Micro-organism Fish	48 hours 3 hours 96 hours

Persistence and degradability

Product/ingredient name	Test	Result		Dose		Inoculum
molybdenum di(2-ethylhexyl) phosphorodithioate	OECD 301B	11 % - Not readily - 28 days		-		-
Product/ingredient name	Aquatic half-life		Photolysis		Biodeg	radability
molybdenum di(2-ethylhexyl) phosphorodithioate	-		-		Not rea	dily

Bioaccumulative potential

Not available.

Mobility in soil

Soil/water partition coefficient (Koc)

Not available.

Other adverse effects No

No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

 Validation date
 : 10/17/2018
 Date of previous issue
 : 6/14/2018
 9/12

Section 13. Disposal considerations

Disposal should be in accordance with applicable regional, national and local laws and regulations.
