CRC LUBRICANTS

Power Lube® Multi-Purpose Lubricant

Multi-Purpose Lubricant

FEATURES & BENEFITS

Lubricant, penetrant, corrosion inhibitor and moisture displacer all in one product

Frees rusted parts

Stops squeaks

Clings to surfaces to deliver long-lasting lubrication with less mess

Removes rust and corrosion

May be used to soak and loosen seized parts

APPLICATIONS

Speedometer cables, hinges, seat slides, door locks, wheels, lug nuts, power antennas, battery terminals, distributors, air tools, switches, clocks, firearms, fishing reels, bicycles and thousands more uses

Use on metal, rubber, wood and plastic

Heavy Duty Silicone

Multi-Use Silicone Lubricant

Around the house, CRC Heavy Duty Silicone is great for sliding closet doors, slide window channels, drawer runners, metal hinges – even the hinges on your microwave door.

Use it on any kind of seal or gasket and even the blades of your paper shredder.

FEATURES & BENEFITS

Extremely versatile lubricant

Repels water, stops rust and drives away moisture

Great for sliding parts

Odorless

Protects from 40°F to 400°F

Will not attract dirt or dust

Provides an invisible layer of lube

Not for use on plastics or painted surfaces

APPLICATIONS

Wood, rubber, nylon, metal, seat adjusters, sunroof tracks, hood or trunk latch release, sliding rear windows, metal hinges, seals and gaskets, zippers, springs, pulleys, sliding closet doors, slide window channels, drawer runners, paper shredder blades

White Lithium Grease

Long Lasting Lubrication

FEATURES & BENEFITS

Long lasting lubrication

Superior water and heat resistance

Excellent metal-to-metal lubricant

Product may attract dirt; not for use on wheel bearings or areas where appearance is important

Will not wash out, melt or freeze

APPLICATIONS

Brake and gear shift mechanisms, steering parts, trailer balls, hinges, locks, latches, distributor cams, seat tracks, strike plates, cables, battery terminals, radio antennas, windshield wiper mechanisms, bolts, bearings, appliances, lawn and garden equipment, water pumps, chains, screws, garage door tracks, guns, tools, fans, blowers, roller channels, conveyors, gears, machinery, pneumatic tools, blades and bits

CRC FREEZE-OFF TESTIMONIALS

I manage a fertilizer dealership. Fertilizer causes corrosion and rust like you can't believe. We tried CRC FREEZE-OFF on a very heavily rusted 1/2" bolt and nut, and in about 3 minutes time it completely loosened it up so it could be turned with a crescent wrench. Normally, we would have had to use a cutting torch to remove a bolt this badly rusted. I was actually amazed!
– Washington

I have used CRC FREEZE-OFF numerous times in automotive work. It will free up rusted or stuck bolts/nuts in just a few minutes. The longest I have had to wait is about 10 minutes for some REALLY stubborn ones. This stuff is amazing!!
– Wisconsin

CRC FREEZE-OFF is worth every cent! It's saved my backside quite a few times, otherwise I would have spent hours trying to remove broken bolts.
– Kuwait

I love the FREEZE-OFF. It is amazing at penetration and rust removal.
– Nevada

Rear brake pads on 04 RAV4 needed replacement. After 5 years of New York winters the pins that hold the pads in were rusted/welded to the caliper, used PB Blaster and one side was soaked for 24 hours. Couldn't get the bottom pin out on both sides. Used the CRC FREEZE-OFF, sprayed for 45 seconds each and the pins came out. The product freezes and contracts the offending part to break the seal.
– New York

I run a small shop in Indiana and used to use PB Blaster for all my problematic nuts and bolts. The last time it did not work for me someone suggested your product CRC FREEZE-OFF. Now I will never go back! We have had some knuckle busters. We followed the directions and within 5 mins it loosened up and saved the customer a lot of money with us not having to torch out and retap. Thanks.
– Indiana

I just wanted to say FREEZE-OFF is the best. I went through a whole can of PB Blaster to take a hub off but it didn't work. I went to [an auto parts store] and they told me about FREEZE-OFF and it came off really easy.
– Wisconsin

Super Penetrant with Freeze-Shock Action

Freeze-Off® Super Penetrant

FEATURES & BENEFITS

- Immediately drops the temperature of the area in direct contact with the spray
- Freeze-shock action freezes and cracks rust
- Dissolves rust, gums and corrosion
- Penetrates deeper than other products
- Lubricating film prevents corrosion and displaces water
- Not for use on plastics

APPLICATIONS

- Rusted suspension, steering and axle parts
- Rusted and corroded nuts, bolts, fittings, couplings, exhaust clamps, wheel studs, hinges
- Locks and frozen components

CRC FREEZE-OFF is different from all other penetrants. The 'train' that carries the potent solvent blend to the rusted bolt is a powerful refrigerant. FREEZE-OFF actually drops the temperature of the stuck part so it can contract within its rusty cavern, and that allows the penetrant to slip in and lube the joint for easier removal. This is called 'freeze-cracking' the rust. Don't give up on those really tough jobs without trying FREEZE-OFF. You'll be amazed at what this product can do!

Ultra Screwloose® Penetrating Oil

FEATURES & BENEFITS

- Fast-acting, concentrated penetrating solvent
- Attacks corrosion to free corroded fasteners and mechanical components
- Penetrates into minute crevices
- Provides proper lubrication and prevents future corrosion
- Removes light adhesives and decals

APPLICATIONS

- Rusted bolts and nuts
- Automobiles, household items, plumbing fixtures, agricultural equipment, guns, sporting equipment, locks
- Rusted suspension, steering and axle parts

Penetrating Oil

CRC SCREWLOOSE is a heavy duty penetrant typically used and loved by exhaust repair shops and other car repair shops that have to deal with rusted suspension, steering and axle parts and even wheel studs and nuts.

MORE CRC PRODUCT TESTIMONIALS

POWER LUBE

Good for breaking loose a rusty item. I think that this stuff used to be called CRC 5-56 and I've used it for many years. It is a very good penetrating oil to get something free that is rusty or stuck.

This works when WD-40 doesn't. I was introduced to CRC POWER LUBE by a mechanic at the Toyota dealership when I asked him what would stop our car doors from squeaking when we opened and closed them. He brought out a can from his workbench and sprayed it on the metal hinges and stops. The squeaking stopped immediately and did not return for over a year. Before that I used to spray them with WD-40 but the squeaks would come back in a month or so. I have happily used this product for general lubrication for several years now.

HEAVY DUTY SILICONE

This product is better than most silicone sprays. It is long lasting and has no odor. I like it for rust prevention.

Great, works as advertised. Used it on my car's electric windows and they now go up and down much faster and smoother.

I used this on my power windows in the creases and it made my slowing windows move like they should. Great stuff to keep in the garage for other little squeaks around the car or home. Lasts longer than something like WD-40.

— Massachusetts

I use it mostly to lubricate my slider doors; it doesn't leave an oily residue, so dirt and junk don't stick to it. It lubricates the tracks, and it makes the slider door move quietly. I also use it on my microwave door hinges and push button area; it works pretty well. I believe it comes with a red straw that can help you direct the spray into a small area (like the microwave door handle area). Anyway, it lasts a long time, and it also can be used to recoat rubber gaskets like for water filter units.

— California

WHITE LITHIUM GREASE

Very useful grease. I used it to lubricate my car's sunroof railing and it does a great job.

This is quality stuff! Highly recommend. Used it when assembling an elliptical and it has kept the gears from grinding completely.

— Maryland

Can be sprayed on items without creating a huge mess. Holds up very well in tuff weather conditions, like wind, driven rain and snow. Cleans up well if you do make a mess.

— Texas

You may want to lube the chain on your garage door or where the garage door rubs the outer rubber weather-stripping. Maybe you want to lube the door lock on your truck. Or you have a stuck bolt or screw and the last thing you want to do is take a chance of breaking it off. The success of your project and your effort will depend on whether or not you choose the right "helper" in a can.
