CRC TrueTap AQUA Cutting Fluid

A water-soluble cutting fluid. It provides excellent cooling and lubrication and is a suitable replacement for solvent or oil-based cutting fluids. This product works well in machine tools containing water-soluble coolants. It will emulsify with the coolant without causing contamination.

This fluid is ideal for tapping and drilling ferrous and non-ferrous materials. Leaves a soft residue, which is easily rinsed away.

WARNING: Contains Triethanolamine 102-71-6, Water 7732-18-5 and Polyether Phosphate (Proprietary).

Use only in a well ventilated area. Avoid breathing mist, may cause irritation of the respiratory tract. Avoid contact with eyes and skin.

FIRST AID: In case of eye or skin contact, flush with water for 15 minutes. If swallowed induce vomiting. If too much is breathed, remove to fresh air. For severe overexposure call a physician immediately. For additional information, consult the Material Safety Data Sheet for this product.

DIRECTIONS: Read entire label before using this product. Apply to tool before coming in contact with the work, using only enough to coat the tool. After cutting, use a CRC Cleaner/Degreaser and a CRC corrosion inhibitor to clean and protect parts.

All used and unused product should be disposed of in accordance with local, state and federal regulations.
