Professional Brake Maintenance Kit

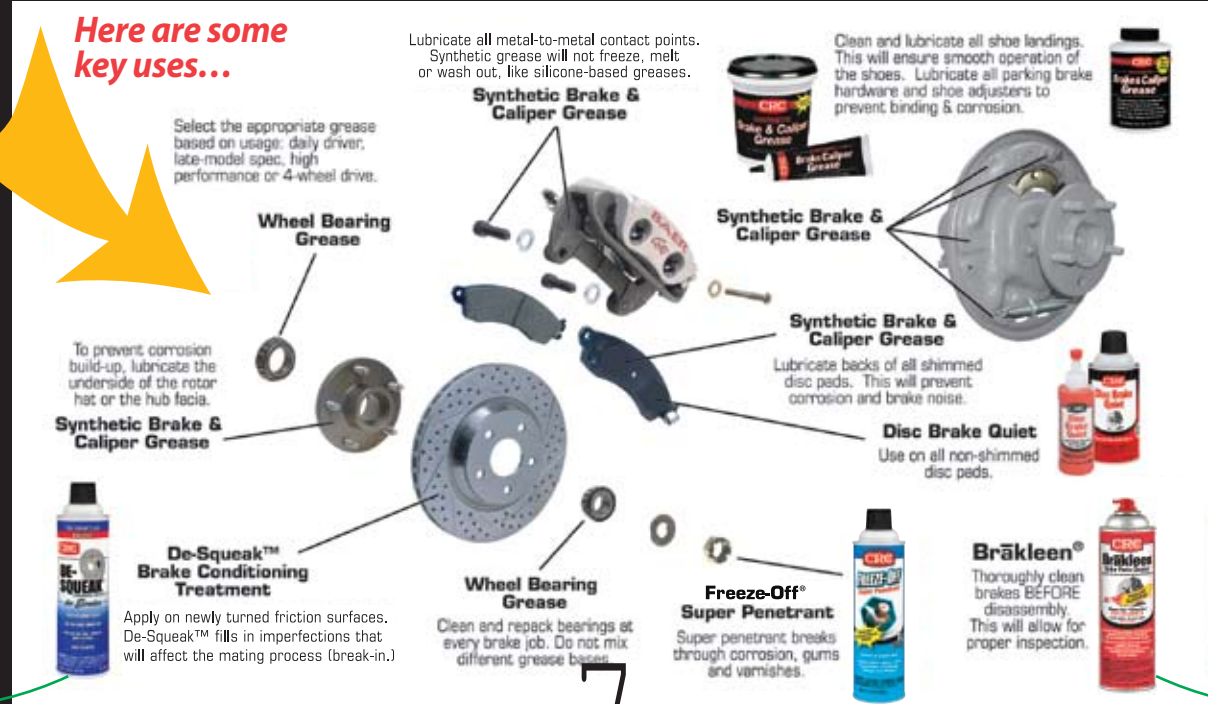

Brake maintenance made easy!

Professional Brake Maintenance Kit Reference Guide for Brake Maintenance Chemicals

Here are some key uses...

Professional Brake Maintenance Kit

CRC's Professional Brake Maintenance Kit is designed to provide you with the essential performance chemicals required to get the job done right the first time!

Trust CRC - the Brake Experts!

Getting started... In addition to the kit, you will need: floor jack, lug nut wrench, screwdriver, pliers & replacement parts.

Safety first... Make sure vehicle is properly jacked and secure before performing any undercar maintenance.

Look inside... to find a quick reference guide detailing the proper steps for performing typical brake maintenance, and for cleaning & prepping of all parts to keep your brakes operating optimally.

For additional information on products contained in this kit or other performance chemicals, visit CRC at www.crcindustries.com.

Professional Brake Maintenance Kit

Brake Maintenance made easy!

Proper brake maintenance is key for safe vehicle operation and for preventing brake system malfunction. This kit contains specialized products, each individually engineered to clean and protect specific components for maximized performance.

CRC's Professional Brake Maintenance Kit will supply the performance chemicals needed to successfully maintain this important system - PLUS a free 4-pack of Nitrile Technician gloves.

Additional CRC/STA-LUBE items such as Freeze-Off® Super Penetrant, Hi-Temp Disc Brake Bearing Grease, Heavy Duty Drum Brake Bearing Grease and New Generation™ Wheel Bearing Grease can also be used during brake system maintenance.
