

Professional

BRAKE SERVICE KIT

Kit Contents:

- 1 **#095050 Brakleen® 50-State Formula with PowerJet™ Technology**
Strongest 50-State formula on the market quickly removes brake fluid, grease and oil from brake and wheel parts.
- 2 **#05080 De-Squeak™ Conditioning Treatment**
Fills grooves in friction surfaces for smoother braking & eliminates noise.
- 3 **#05002 Freeze-Off® Super Penetrant**
Freezing effect cracks rusted surfaces allowing solvent to penetrate faster and lubricate more effectively.
- 4 **#SL3190 Sta-Plex™ E.P. Premium Red Grease**
Excellent extreme pressure, high-temp grease won't melt or sling out of wheel bearings.
- 5 **#091444 Disc Brake Quiet Polymer**
Water-resistant, high-temp film instantly absorbs vibrations and quiets disc brake noise. For use on back of non-shimmed disc pads.
- 6 **#SL3301 Synthetic Brake & Caliper Grease**
Synthetic grease prevents caliper binding, vibration and corrosion. Contains molybdenum, PTFE and graphite for extreme temperatures.
- 7 **FREE CRC Nitrile Technician Gloves!**
Free 4-pack of nitrile gloves to protect your hands from chemicals, nicks & cuts and keep them clean while servicing your brakes!

PowerJet™ Technology super-cleans and blasts away brake dust, brake fluid, grease & oil in no time!

Bright red color —

— Hypoallergenic

Nitrile gloves are more durable, puncture and chemical resistant than latex gloves!

Part No.:

091700

Professional BRAKE SERVICE KIT

Part No.:
091700

Proper brake maintenance is key for safe vehicle operation and for preventing brake system malfunction. This kit contains the same quality products professional technicians rely on when they do a brake job. Each NAPA/CRC product is individually engineered to clean & protect specific brake components for maximized performance.

CRC's Professional Brake Service Kit is a necessary companion to the hard parts you'll need when servicing your brakes. This kit provides the performance chemicals required for a complete professional brake job, every time. PLUS, you get a FREE 4-pack of CRC Nitrile Technician gloves inside!

#095050 Brakeleen® 50-State Formula with PowerJet™ Technology

Strongest 50-State formula on the market quickly removes brake fluid, grease and oil from brake and wheel parts.

#05080 De-Squeak™ Conditioning Treatment

Fills grooves in friction surfaces for smoother braking & eliminates noise.

#05002 Freeze-Off® Super Penetrant

Freezing effect cracks rusted surfaces allowing solvent to penetrate faster and lubricate more effectively.

#SL3190 Sta-Plex™ E.P. Premium Red Grease

Excellent E.P., high-temp grease won't melt or sling out of wheel bearings.

#091444 Disc Brake Quiet Polymer

Water-resistant, high-temp film instantly absorbs vibrations and quiets disc brake noise. For use on back of non-shimmed disc pads.

#SL3301 Synthetic Brake & Caliper Grease

Synthetic grease prevents caliper binding, vibration and corrosion. Contains molybdenum, PTFE and graphite for extreme temperatures.

FREE CRC Nitrile Technician Gloves!

Free 4-pack of nitrile gloves to protect your hands from chemicals, nicks & cuts and keep them clean while servicing your brakes!

Monthly Maintenance Reminders:

- ✓ Check battery for signs of dirt or corrosion
- ✓ Ensure all lights (head/taillights, interior) are working properly
- ✓ Troubleshoot any noises from engine or undercar
- ✓ Inspect windshield wipers for proper window contact
- ✓ Check tire pressure to ensure proper levels

Quick Reference Guide for Brake Maintenance Chemicals

ATTENTION:
Review vehicle manufacturer specifications prior to disassembly / reassembly of brake system.

Quick Tips

Remember to apply parking brake, put car in gear & chock wheels.

❖ Always replace brake parts in axle sets.

❖ Always tighten wheel lugs in a 5-star pattern.

❖ Remember to wear CRC Nitrile Gloves to protect hands from chemicals, nicks & cuts

❖ Always follow manufacturer's specifications when servicing brakes and selecting parts such as friction materials (pads), rotors, calipers, fluid, etc.

Lubricate all metal-to-metal contact points. Long-lasting grease will not freeze, melt or wash out, like silicone-based greases.

Clean and lubricate all shoe landings. This will ensure smooth operation of the shoes. Lubricate all parking brake hardware and shoe adjusters to prevent binding & corrosion.

Select the appropriate grease based on usage: daily driver, late-model spec, high performance or 4-wheel drive.

Synthetic Brake & Caliper Grease

Synthetic Brake & Caliper Grease

Synthetic Brake & Caliper Grease

Lubricate backs of all shimmed disc pads. This will prevent corrosion and brake noise.

Disc Brake Quiet
Use on all non-shimmed disc pads.

Bräkleen®

Thoroughly clean brakes BEFORE disassembly. This will allow for proper inspection.

Wheel Bearing Grease

Synthetic Brake & Caliper Grease

To prevent corrosion build-up, lubricate the underside of the rotor hat or the hub facia.

De-Squeak™ Brake Conditioning Treatment

Apply on new, freshly turned or existing friction surfaces. De-Squeak™ fills in imperfections that will affect the coefficient of friction.

Wheel Bearing Grease

Clean and repack bearings with every brake job. Do not mix different grease bases.

Freeze-Off® Super Penetrant

Super penetrant breaks through corrosion, gums and varnishes.
