IF SWALLOWED, VAPOR HARMFUL, EYE IRRITANT.
READ WARNINGS ON BACK PANEL.**

PART NO. 095344
Net Contents 12 fl. oz. (355 mL)

NAPA/CRC TRANSMISSION LEAK-STOP & CONDITIONER

Stops leaks and prevents seepage due to hardening of transmission seals. Revitalizes seals and restores their plasticity. Smooths shifting and quiets operations. Transmission fluid level should be checked every 500 miles and changed according to the manufacturer's instructions. **NOTE: Leak-Stop is not a cure-all. It will not replace worm metal, nor revive seals which are cracked, flaked or broken. It will not compensate for mechanical defects. If leak-stop does not stop leaks, it may be necessary to replace seals.**

DIRECTIONS: Read entire label before use. Pour one container into automatic transmission. Under normal driving conditions, leaks should stop within 50-100 miles. Use entire contents at once.

WARNING: Contains Petroleum Distillate 64742-52-5, Diacetone Alcohol 123-42-2, Xylene 1330-20-7, Ethyl Benzene 100-41-4 and Isopropyl Alcohol 67-63-0. Product is flammable and should be kept from all flames and ignition sources. Overexposure to vapors may cause headache, eye irritation, dizziness, nausea, upper respiratory irritation, and central nervous system effects. Deliberately concentrating and inhaling contents may be harmful or fatal. This product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm. Use only in a well ventilated area. Avoid contact with skin and eyes. **FIRST AID:** In case of eye or skin contact, flush with large amounts of water for at least 15 minutes. If swallowed, **DO NOT** induce vomiting. If too much is breathed, remove to fresh air. For severe overexposure, call a physician immediately. **KEEP AWAY FROM CHILDREN.**

All used and unused product should be disposed of in conformance with local, state, and federal regulations. For additional information, consult the Material Safety Data Sheet for this product.
