RADIATOR & ANTI-RUST WATER PUMP LUBRICANT

ANTI CORROSIVO PARA RADIADOR Y LUBRICANTE PARA LA BOMBA DE AGUA

WARNING: MAY CAUSE EYE IRRITATION.

READ WARNINGS ON BACK PANEL.

Net Contents: 11 fl. oz. (326 mL) No. 401312

K&W RADIATOR ANTI-RUST & WATER PUMP LUBRICANT is for use in all cooling systems, including aluminum. Protects metals in the system. Eliminates water pump squeal, lubricates water pump seals and all moving parts. Will not harm hoses or gaskets. Works with any standard anti-freeze. For cooling systems up to 22 quarts.

DIRECTIONS: Read entire label before using this product.

1. For best results, drain and flush system with K&W 7 Minute Radiator Flush, Part #401320.
2. Insure that system is filled with recommended level of coolant. With engine off and cool, add entire contents to radiator. Use entire contents at once.
3. Run engine to mix Anti-Rust thoroughly.

WARNING: Contains Water 7732-18-5, Naphthenic Oil 64742-53-6 and Petroleum Sulfonate 64741-88-4. Avoid continuous breathing of vapors. Avoid contact with skin and eyes. **FIRST AID:** In case of eye or skin contact, flush with large amounts of water for at least 15 minutes. If swallowed, do not induce vomiting. If too much is breathed, remove to fresh air. For severe overexposure, call a physician immediately. For additional information, consult the Material Safety Data Sheet for this product.

KEEP AWAY FROM CHILDREN.

Disposal: All used antifreeze/coolant and/or radiator fluids should be disposed of in conformance with local, state and federal regulations. Collect and recycle all fluids whenever possible. DO NOT dump in sewers, floor drains, on the ground or into any body of water.

El Anti-Corrosivo para Radiador y Lubricante para la Bomba de Agua de K&W se usa en todos los sistemas de enfriamiento, incluyendo los de aluminio. Protege a los metales en el sistema. Elimina el rechido de la bomba de agua. Lubrica los selladores de la bomba de agua y todas las partes móviles. No daña las mangueras o empaquetaduras. Trabaja con cualquier anti-congelante estándar. Para sistemas de enfriamiento de hasta 22 cuartos.

MODO DE EMPLEO: Leer completamente la etiqueta antes de usar el producto.

1. Para mejores resultados, drene y enjuague el sistema con el K&W 7 Minute Radiator Flush, No. de parte 401320.
2. Asegúrese de que el sistema tenga el nivel recomendado de enfriador. Con el motor apagado, añada el contenido completo del envase al radiador. Use todo el contenido en una sola aplicación.
3. Ponga el motor en marcha para que se mezcle completamente con el Anti-Corrosivo.
