## MARYKATE Nano Boat Wax

WITH CARNAUBA & PTFE

MARYKATE has combined Carnauba and PTFE with the revolutionary NANOTECHNOLOGY chemical process to engineer the most advanced marine wax on the market. The nano particles in MaryKate Nano Boat Wax cover a greater surface area and penetrate deeper to fill fine scratches and swirl marks. Carnauba provides a long-lasting, brilliant finish. PTFE adds slip, superior UV protection and water repellency as well as excellent abrasion resistance.

**DIRECTIONS:** Read entire label before using this product. Starting with a clean surface, apply a thin, even coat of MaryKate Nano Boat Wax one section at a time using a soft cotton cloth or sponge applicator. Allow several minutes for wax to form a haze on the surface, then use a clean cloth or a random orbital buffer and buff to a high gloss shine.

**WARNING:** Contains petroleum distillates 64/42-88-7. If ingested, DO NOT induce vomiting, contact a physician immediately. Avoid breathing vapors. Product is combustible. Keep away from heat and flames. Keep from freezing. Keep out of reach of children.
